

Hospital Application Form: Recognition to host a Training Interface Group fellowship post in Oncoplastic Breast Surgery

Introduction

The fellowship programme is run through the Joint Committee of Surgical Training (JCST). The following Speciality Advisory Committees (SAC) are involved:

- General Surgery
- Plastic Surgery

Fellowship posts are open to higher surgical trainees in those disciplines listed above that meet the person specifications. Details of eligibility are found through the JCST.

Any unit applying to host Training Interface Group fellows must have trainer representation from all parent specialties.

This form relates to all specialties involved in the training programme and should be completed by the lead surgeon with assistance from representatives from each specialty. Successful units will have approval granted for a period of three years, but should inform the JCST of any major changes to the unit that take place during that time. It is intended that a redacted version of the completed form for all units successful in appointing a fellow will be published on the JCST website.

Applicant units are required to adhere to the quality indicators (QIs). Please note that from August 2018 any unit appointing a fellow will be expected to take part in the relevant round of fellowship recruitment.

Applicants should be aware that any expenses incurred should they be invited to any meetings to present/meet with the Training Interface Group must be met by the applying Trust(s)/Board(s) or the local Deanery/LETB.

This form should be completed and submitted electronically to interface@jcst.org

Indicative Timetable

The fellow should be based at the main hospitals/Trusts for most of their educational activity but one session (professional activity) may occur outside these units each week. A trainee may work for 48 hours and if there is no on-call, all this time may be used for training.

Please provide an indicative timetable that indicates the type of proposed activity and includes supporting professional development (SPD). SPD should be one half day each week. Please note that the timetable must be compatible with the Quality Indicators specific to the relevant TIG. All Quality Indicators may be found online at <https://www.jcst.org/training-interface-groups/quality-processes/>

Types of activity

- Combined outpatient clinic (COC)
- Other outpatient clinics (OOC)
- Operating theatre (Th)
- Multi-disciplinary team meeting (MDT)
- Supporting Professional Development (SPD)
- Teaching ward round (WR)
- Research activities (RA)

Please indicate the activity and the trust, for example, MDT (A) or Th (B).

Oncoplastic Breast Surgery

					Correction of tuberous breast by combinations of mastopexy, augmentation or tissue expansion	6
					Unilateral or differential mastopexy in pattern or extent to attain symmetry	10
					Revision procedures following previous aesthetic surgery of the breast	15
					Aesthetic surgery of the breast as above in patients with previous breast cancer or irradiation	>50
					Fat grafting for minor deformities of the breast	35

Hospital Application Form: Recognition to host a Training Interface Group fellowship post in
Oncoplastic Breast Surgery

Facilities

Access to IT (including Internet), library and journals on site:

Free Trust Guest Wi-Fi access

Eduroam Access

Medical Library

University Information Commons

Access to all relevant journals through College and Medical Library subscription access (principally electronic)

Dedicated PGMDE facility, resources and support staff

Microsystems coaching academy

Access to wet lab / simulation / surgical skills facilities (include location and frequency of attendance):

Basic Surgical Skills laboratory

Access to cadaveric specimens through Medical School, by permission (not for interventional practice).

Hospital Application Form: Recognition to host a Training Interface Group fellowship post in
Oncoplastic Breast Surgery

Peer review

Date of last Peer Review: November 2015 (Separate document attached)

Summaries of areas of notable practice, summaries of development needs, action plans and progress summaries are included in the reports.

Outcomes of formal visits

CQC Visit December 2015 (Separate document attached)

NHSBSP QA Visit: May 2016 (Separate document attached)

Summaries of areas of notable practice, summaries of development needs, action plans and progress summaries are included in the reports.

Hospital Application Form: Recognition to host a Training Interface Group fellowship post in
Oncoplastic Breast Surgery

Training Delivery

Please identify how you can supply surgical experience in the advanced surgical modules. It is expected that units will be able to cover all curriculum modules.

Module 1: Basic Sciences and Breast Assessment

Deanery education events.

MDTM

Supervised clinical practice in Fast Track Clinic. Annual symptomatic new-case load referral of 4,500 cases per year.

Supervised clinical practice in Follow-up Clinics

Targeted WBA utilization

Module 2: Benign Breast Conditions

MDTM

External Breast Courses

Fast Track Clinic Assessments

Out-patient Clinics

Benign breast surgery surgical cases. Logbook/ISCP

Targeted WBA utilization

Journal club

Module 3: Breast Cancer

External courses.

Access to the Advanced Breast course at RCS.

Weekly MDTM (partitioned into new diagnoses, post-operative, metastatic

Targeted WBA utilization

Supervised clinical practice and flexible case selection for TIG Fellows for targeted operative skill and accelerated independent practice development

Journal club

Annual case load of 550 new breast cancer diagnoses

Hospital Application Form: Recognition to host a Training Interface Group fellowship post in
Oncoplastic Breast Surgery

Module 4: Implant Breast Reconstruction

OMDTM

Theatre lists (see timetable)

Combined reconstruction clinics (see timetable).

Supervised clinical practice and flexible case selection for TIG Fellows for targeted operative skill and accelerated independent practice development

Module 5: Autologous Tissue Based Reconstruction

OMDTM

Theatre lists.

Combined reconstruction clinics.

Supervised clinical practice and flexible case selection for TIG Fellows for targeted operative skill and accelerated independent practice development

Module 6: Aesthetic Surgery of the Breast

Aesthetic Fellowship - infrastructure already exists and we have had three Fellows in the last three years.

Timetable is independent of the TIG Fellowship.

Easy access to both plastic, reconstructive and breast aesthetic surgery within our unique arrangement of a combined directorate.

Encourage attendance to relevant high-end external courses and meetings eg Breast Aesthetics Course, ORBS, Milan Breast Aesthetics Course, London Breast Meeting etc.

External unit visits.

ABS, BAAPS, BAPRAS annual meetings.

Private practice attendance with at least 5 of the department's Plastic Surgeons (Thornbury and Claremont Hospital).

Bi-weekly Oncoplastic MDTM.

Targeted operative skills development

OPBS TIG fellow is offered flexible access to opportunities and can 'cherry pick'

This unit was a founding TIG unit and has had 12 previous Fellows who have helped advance the delivery of TIG focused training

All previous 12 OPBS TIG Fellows have successfully obtained consultant posts within 12 months

Hospital Application Form: Recognition to host a Training Interface Group fellowship post in
Oncoplastic Breast Surgery
