

# Surgery Specific ARCP Outcomes During COVID-19

Flowchart	Scenario
1	<a href="#"><u>Run through ST2 on Outcome 1 for ST1</u></a>
2	<a href="#"><u>Uncoupled CT2 on Outcome 1 for CT1</u></a>
3	<a href="#"><u>Run through ST2 on Outcome 2 for ST1</u></a>
4i	<a href="#"><u>Uncoupled CT2 with MRCS on Outcome 2 for CT1</u></a>
4ii	<a href="#"><u>Uncoupled CT2 without MRCS on Outcome 2 for CT1</u></a>
5	<a href="#"><u>ST6 on Outcome 1 for ST5</u></a>
6	<a href="#"><u>ST6 on Outcome 2 for ST5</u></a>
7	<a href="#"><u>ST8 on Outcome 1 for ST7</u></a>
8	<a href="#"><u>ST8 on Outcome 2 for ST7</u></a>

Curriculum derogations, where required, to permit the use the of these outcomes have been approved by the GMC

# General Principles

- Standard ARCP outcomes should be used where possible
- If a trainee was demonstrating the correct training trajectory, including pro rata satisfactory WBAs, *before* any COVID-19 disruption, and other training year outcomes have been met, then an outcome 1 is appropriate
- If a trainee was not on the correct trajectory *before* COVID-19 disruption (and the deficit could not have been made up even if training had not been disrupted) then outcome 2 or outcome 3 may be appropriate
- Outcome 10 should be awarded only if delay in achievement of competencies for the training year was *due to COVID-19 disruption* (no fault)

# General Principles

- Outcome 10.1
  - May be used to permit progression if there are training level requirements which have not been met due to COVID-19 related disruption.
  - May be used at the end of Core Surgical Training to permit an extension to training time where COVID-19 has prevented acquisition of all competencies (e.g. MRCS).  
Outcome 10.1 at CT2 will permit progression to ST3 for those trainees who were appointed to ST3 in 2020 national selection.
  - May be used at ST6 (ST5 in OMFS and Urology) to permit progression or an extension to training time if curriculum requirements for this level have not been met **due to COVID-19 related disruption**
- Outcome 10.2
  - Should be used to permit an extension to training time for trainees at the end of specialty training where acquisition of curriculum requirements was prevented due to COVID-19.
- Outcome 6 at the end of core and specialty training should only be awarded if all curriculum requirements have been achieved.
